CS9 - EMPLOYEE DETAILS USING CLASS

CS-9 **Create a C++ program to create a class employee containg the following members in public.**

Public members

eno integer

name 20 characters

des 20 characters

member Function

void get() to accept values for all data members

Declare the derived class called Salary which contain the following details.

Public members

bp, hra, da, pf, np float

member Function

void get1() to accept values for bp,hra,da and pf and invoke calculate()

calculate() calculate the np by adding bp,hra,da subtracting pf

display() Display all the details

Create the derived class object and read the number of employees.Call the function get(),get1() for each employee and display the details

Coding

```
#include<iostream>
using namespace std;
class emp{
public:
int eno;
char name[20], des[20];
void get(){
```
