2.5.2 Conversion of Time

Calculation of time to the nearest seconds is very essential in some situations like launching rocket, running race, arrival and departure. So, we need to know the conversion of time.

Let us remember the time related chart as follows:

Example 12: A farmer ploughed the field for 3 hours 35 minutes. How many minutes did he plough?

Solution:

Time for which the farmer ploughed the field = 3 hours and 35 minutes
= 3 x 60 minutes + 35 minutes
= 180 minutes + 35 minutes
= 215 minutes

Examples 13: A handloom weaver takes 6 hours 20 minutes 30 seconds and 5 hours 50 minutes 45 seconds to weave two silk sarees. What is the total time to weave the two silk sarees?

Solution:

	Hours	Minutes	Seconds
Time taken to weave the first silk saree	6	20	30
Time taken to weave the second silk saree	5	50	45
Total time taken to weave the two silk sarees	11 hours	70 minutes	75 seconds
	= 11 hours	60 minutes+10 minutes	60 seconds+15 seconds
	= 11 hours = 12 hours	1 hour+10 minutes 11 minutes	1 minute + 15 seconds 15 seconds

Example 14: A satellite is placed in its orbit in 7 hours 16 minutes 20 seconds. Calculate it in seconds.

Solution: The satellite reaches its orbit in 7 hours + 16 minutes + 20 seconds
= (7 x 60 x 60) seconds +(16 x 60) seconds +20 seconds
= 25200 seconds + 960 seconds + 20 seconds
= 26,180 seconds

The satellite reaches its orbit in 26,180 seconds

Example 15: Two cyclists took 5 hours 35 minutes 10 seconds and 8 hours respectively to cover the same distance. Find the difference in time taken by them

Solution:

Hours	Minutes	Seconds
7 ~~8~~	59 ~~60~~ 00	60 ~~00~~
5	35	10
2	24	50

1 hour
1 minute

Try these

Convert the following:

i) 4 hours =____ minutes
ii) 240 minutes =____ hours
iii) 30 minutes =____ seconds
iv) 3600 seconds =____ hours
v) 2 hours = ____ seconds
