Activity

Students are divided into groups and each group is given 3 sticks of length 9 units, 2 sticks of length 3 units, 2 sticks of length 2 units, 1 stick of length 5 units and 1 stick of length 4 units. Using the given sticks they are asked to form three triangles, find the length of the sides of each triangle and tabulate them.

Triangle	Length of side 1	Length of side 2	Length of side 3	All sides are equal / 2 sides are equal / 3 sides are different
1				
2				
3				

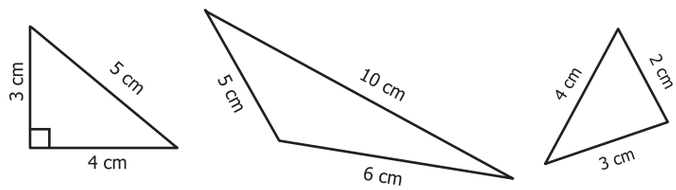

Read the table and answer the following questions.

1. Was each group able to form 3 triangles?
2. In each of the triangle formed, how many sides are equal?

4.3.1 Types of triangle based on its sides

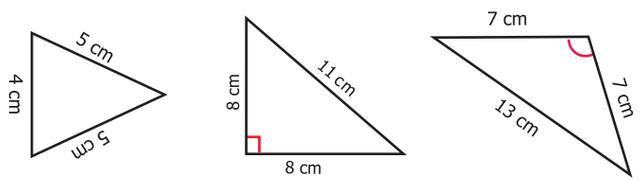

i) If three sides of a triangle are different in lengths, then it is called a ***Scalene Triangle***

Examples:

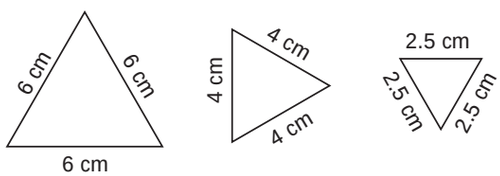

ii) If any two sides of a triangle are equal in length, then it is called an ***Isosceles Triangle***

Examples:

iii) If three sides of a triangle are equal in length, then it is called an ***Equilateral Triangle***

Examples:

Thus, based on the sides of triangles, we can classify triangles into 3 types.
