7.6.3 Yellow Fruits and Vegetables

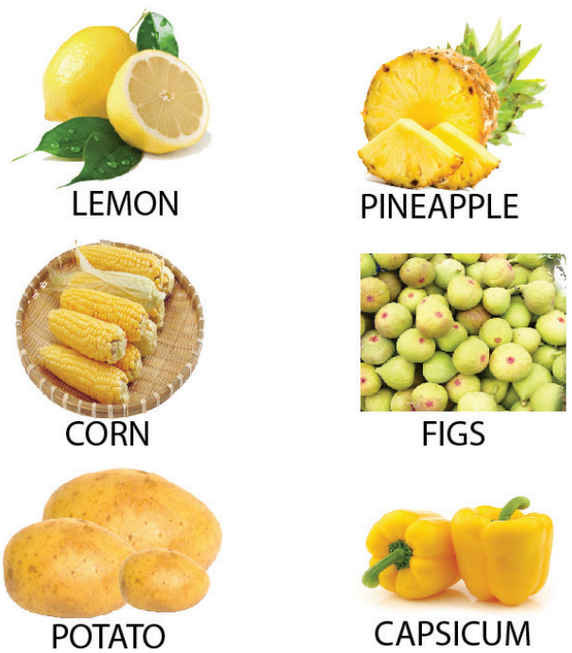

Fig 7.3: Yellow Fruits and Vegetables

Yellow foods are high in antioxidants like **vitamin C and phytosterols.** Vitamin C keeps our teeth and gums healthy, helps to heal cuts and wounds improves the mucus membranes (like when we have colds), helps to absorb iron, prevents inflammation, improves circulation, and therefore prevents heart disease.

7.6.4 Green Fruits and Vegetables

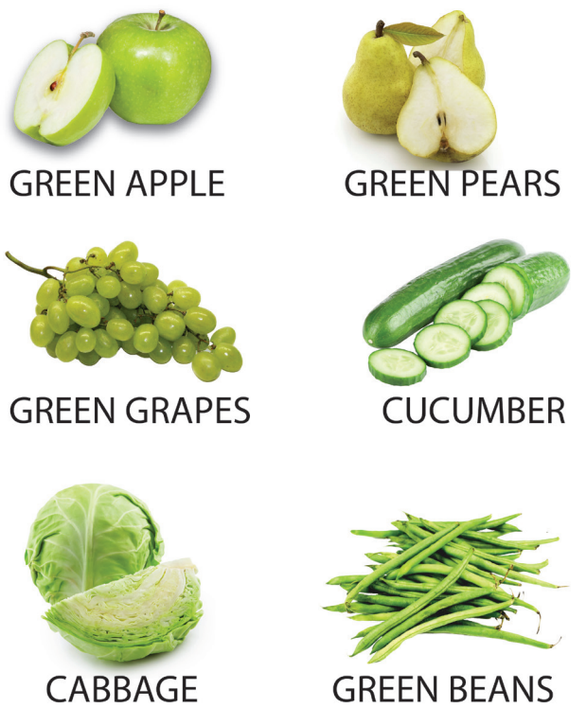

Fig 7.4: Green Fruits and Vegetables

These foods have the phytochemicals like **Terepenes, Sulforaphane and Indoles,** which both prevent cancer. They are also good for the circulatory system and are good sources vitamin B and minerals. Yellow green vegetables like figs, grapes, cucumber etc have carotenoids and lutein that help to prevent cataracts and eye disease, as well as osteoporosis.
