malnourished children. Either fresh milk or skimmed milk can be used for preparing the formula. Sugar and vegetable oil are added to increase the energy content. In older children, an entirely liquid diet is not necessary as they can accept solid foods. A mixed cereal-based diet can be given with added oil to increase energy density.

ACTIVITY - 3

(Think and answer)

1) Ramu has stunted growth, severe diarrhoea, moon face and oedema. What is he suffering from?

   _____

2) Sheela has dry wrinkled skin, severe muscle wasting and diarrhoea. What is she suffering from? _____

   _____

3) Suggest a calorie and protein rich breakfast for a child recovering from PEM.

Vitamin and Mineral supplements

Vitamin and mineral supplements should be given for all malnourished children. Daily supplements of iron (60mg/day) and folic acid (1 microgram/day) should be given to correct anaemia along with multivitamin preparation.

With this treatment, clinical improvement is seen within a week. The child becomes alert and the appetite improves; Oedema disappears in about 7 -10 days. During this period, there may be some weight loss, but thereafter, the child starts gaining weight . After the child is discharged form the hospital, he should be followed up in the out-patient clinic or at home till he reaches normal weight for height.

Low cost recipes for children recovering from PEM

1) Ragi, green gram, jaggery - puttu
2) Ragi, Bengal gram, wheat - puttu
3) Wheat rava, green gram dhal, vegetable - upma
4) Rice, green gram dhal - pongal / khichdi
5) Rice, bengalgram - porridge

LIPIDS

The term 'Lipids' is applied to a group of naturally occurring substances characterized by their insolubility in water, greasy feel and solubility in organic solvents. They occur in the plant and animal kingdom. Fats are a more concentrated form of storage of energy than carbohydrates. In the presence of adequate supply of carbohydrates, fat is stored in the adipose(fatty) tissue.

10.8 Chemical composition of lipids

Fat is a complex molecule constituting a mixture of fatty acids and an alcohol, generally glycerol. Like carbohydrates, it
