physical growth, thus shorter in stature (dwarf).

- **Myxoedema:** Face of patient becomes expressionless.

11.4.3 Calcium

Calcium is the major element in the body and an adult man weighing 60 kg has nearly one kilogram of calcium. Almost 99% of this calcium is found in the hard tissues of the body, namely the bones and teeth. Vitamin D is essential for the absorption of calcium. In vitamin D deficiency, calcium absorption is impaired.

Functions

- It is essential for the formation of bones and teeth.
