Wheat bran: Wheat Bran is a concentrated source of insoluble fibre and provides health benefits.

Wheat germ: It is a great source of vegetable protein, along with fiber and healthy fats. It is also a good source of vitamin E, magnesium, thiamine, folate, potassium and phosphorus.

Wheat rava: Broken wheat or wheat rava is used in the making of upma, Bisi bela bath, pongal, etc.

Wheat flakes: They are used as breakfast cereals. They are packed with dietary fibre and most varieties are fortified with numerous essential vitamins and minerals.

Maida: It is also known as refined flour. The bran and germ are separated in making white flour or maida. Maida bakes uniformly into a loaf of greater volume and it is more bland in taste and more easily digested. The more the refinement, the lesser the nutritional quality.

Semolina: It is coarsely ground endosperm and its chemical composition is similar to that of white flour.

Macaroni products: These products are also called pasta. These products include macaroni, spaghetti, vermicelli and noodles.

2.3.3.Oats

Oats are whole grains. Neither the bran nor germ is removed in different forms of oats and hence all forms like oat meal, oat flakes and oat bran are nutritious. In oats there are significant amounts of beta glucans, soluble fibre which reduces serum cholesterol.

2.3.4.Barley

Barley malt is used in bakery, processed foods and, in vinegar and syrup making.

2.3.5. Millets

The major millet crops of India are:

- **Pearl Millet / Bajra /Kambu:** India is the largest producer of Pearl millet. This millet is an excellent source of phosphorus which is essential for the structure of body cells. It has the same quantity of protein as wheat.
- **Finger Millet / Nachani / Kezhvaragu:** It is also known as finger millet, ragi and red millet. It is well known in Southern India. This millet is rich in protein. The major proteins of ragi are prolamins and glutelins and they appear to be adequate in all essential amino acids. Ragi is rich in minerals especially calcium with good source of iron. The malted ragi flour can be used along with germinated green gram flour to formulate a high calorie-dense weaning food having excellent nutritional qualities. Ragi flour can be used with milk beverages.
- **Foxtail Millet /Kangni / Thinai:** Foxtail millets are rich in iron and pest-free. Foxtail acts as anti pest
