Unit 4

GMHUZU

FLESH FOODS, MILK AND MILK PRODUCTS

Flesh foods are consumed since prehistoric times. Meat, poultry and fish are known as flesh foods. Flesh foods like meat, poultry, pork and fish provide the body with essential nutrients, minerals and vitamins for it to remain healthy. These foods contain good quality proteins with high biological value. Egg, milk and milk products are also good sources of animal proteins providing the body with essential amino acids which help to promote growth and maintenance of the human body.

In this lesson the students will be able to:

- learn the different types of meat and fish
- understand the nutritional significance of meat, fish, milk and eggs.
- understand the selection criteria of meat, fish and eggs.
- compare the characteristics of fresh and deteriorated egg
