Exercise 4.2

Miscellaneous Practice Problems

1. Draw and answer the following.

i) A triangle which has no line of symmetry

ii) A triangle which has only one line of symmetry

iii) A triangle which has three lines of symmetry

2. Find the alphabets in the box which have

i) No line of symmetry

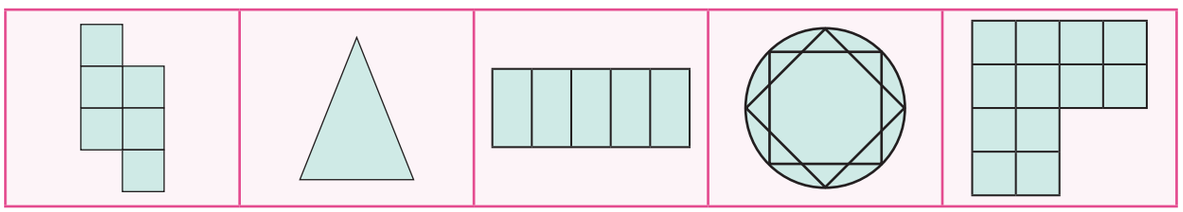

ii) Rotational symmetry

iii) Reflection symmetry

iv) Reflection and rotational symmetry

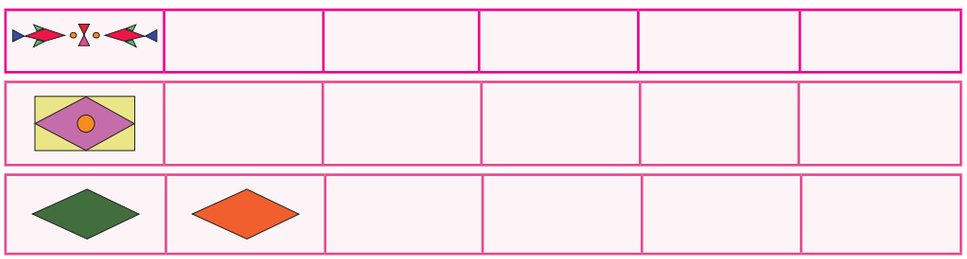

A	M	P	E
D	I	K	O
N	X	S	H
U	V	W	Z

3. For the following pictures, find the number of lines of symmetry and also find the order of rotation.

4. The three digit number **101** has rotational and reflection symmetry. Give five more examples of three digit numbers which have both rotational and reflection symmetry.

5. Translate the given pattern and complete the design in rectangular strip?

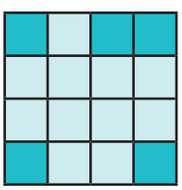

Challenge Problems

6. Shade one square so that it possesses

i) One line of symmetry

ii) Rotational symmetry of order 2

7. Join six identical squares so that atleast one side of a square fits exactly with any other side of the square and have reflection symmetry (any three ways).
