ICT CORNER

MARKET EQUILIBRIUM

Lets study of Equilibrium for Quantity on Demand and Quantity Supplied.

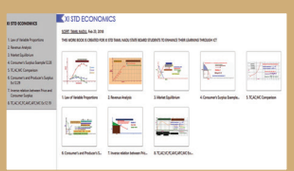

Steps:

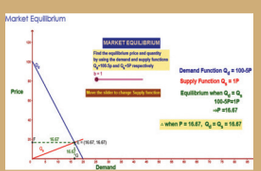

- Open the Browser type the URL given (or) Scan the QR Code.
- GeoGebra Work book called "XI STD ECONOMICS" will appear. In this several work sheets for Economics are given, Open the worksheet named "Market Equilibrium"
- There are two equations 1. Quantity on Demand (QD) and 2. Quantity Supplied (QS). Both the equations are drawn in the graph as straight line. Observe both the lines intersect at a point E.
- That intersection point is called 'Market Equilibrium'. At that point both QD and QS are Equal. Thus, Market equilibrium is obtained when Demand and Supply are equal. Now you change the Supply function by moving the slider "b". Observe the Equilibrium changes as the supply changes. Now Analyse the Market structure required.
