The flow of electric charge in a circuit is called Electric Current.

electricity

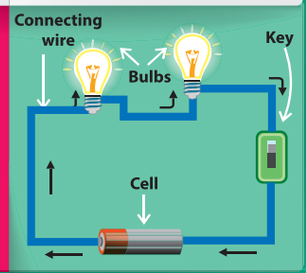

01 Simple Circuit

A circuit consisting of a cell, key, bulb and connecting wires is called a simple circuit

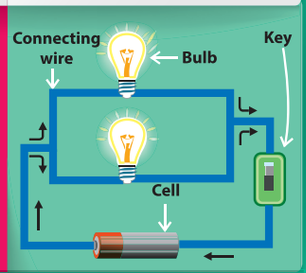

02 Series Circuit

A circuit consisting of a battery, key, bulbs and connecting wires connected in series is called a series circuit

03 Parallel Circuit

A circuit consisting of a battery, key, bulbs and connecting wires connected in parallel is called a parallel circuit

SECONDARY CELL

Secondary cells can be recharged by passing current and used again and again.

PRIMARY CELL

Primary cells can be used only once.

CONNECTING WIRE

Connecting wires are made up of conductors & covered with insulators
