Excretory System

Points to Remember

- The skeletal system gives shape to the body and protects the soft internal organs.
- There are three types of muscles – skeletal muscle (voluntary), smooth muscle (involuntary) and cardiac muscle.
- Circulatory system constitutes the heart, blood vessels and blood.
- Diaphragm – A large flat muscle forming the floor at the chest cavity.
- Digestion is the process of breaking complex food into simple and soluble substances.
- Brain is protected by the skull. It has three parts – cerebrum, cerebellum and medulla oblongata.
- The sense organs are Eyes, Ears, Nose, Tongue and Skin.
