II Answer in Few Sentences — 3 Marks

1. What is meant by a cell?
2. What is meant by secondary cell? Give the examples.
3. What is meant by ampere hour capacity in a battery?
4. Define Electromagnetic force.
5. What is 'Q factor' of the inductor?
6. What is meant by an inductive reactance?
7. What is a transformer?
8. What is meant by turns ratio in the transformer?
9. How transformers are classified depending upon the core?
10. Write down the faults occurred in transformers?
11. What is meant by transducers?
12. What is the function of microphone?
13. Write down the function of loudspeaker?
14. What is a switch?
15. What is the function of circuit breaker?

III Explain the following questions — 5 Marks

1. A 100 ohms bulb is connected with 6 volts battery. Find out the current flows in the bulb?
2. How the inductors are classified? Explain.
3. How speakers are classified as per the frequencies handled by them?
4. Explain the cross over network.
5. Explain about the losses occurred in the transformer.

IV Briefly explains the following questions — 10 Marks

1. Explain the series and parallel connection of cells with necessary diagram.
2. Explain the working of a transformer with neat diagram.
3. What are the precautions to be followed while on servicing?

Answers

1) **b**	2) **c**	3) **d**	4) **d**	5) **b**
6) **b**	7) **a**	8) **b**	9) **b**	10) **a**
