2. If the cost of a square tile is ₹ 52 then what will be the cost of the tiles that Raghavan buys for the front elevation? (see Fig. 6.22)

Fig 6.22

Solution

1.

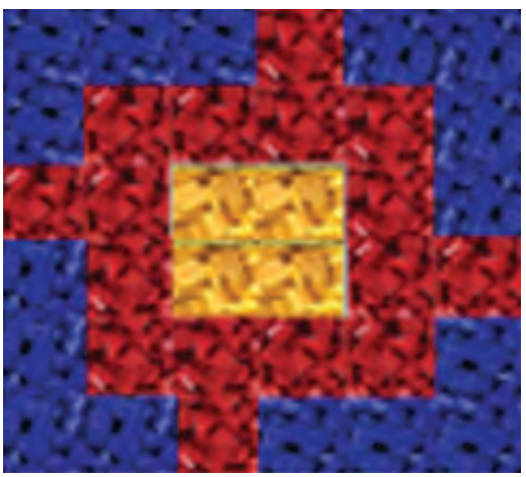

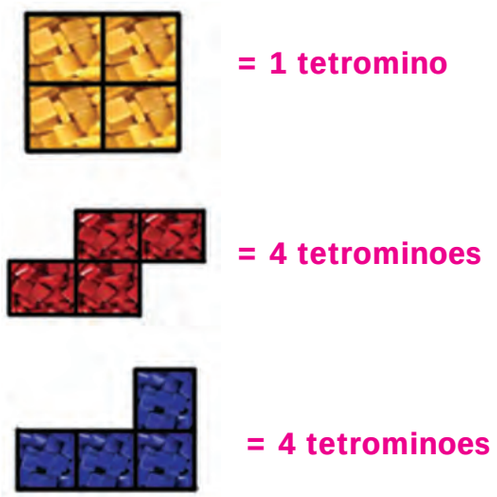

Fig 6.23

In one tile there are

Therefore, there are nine tetrominoes in a tile.

2. Given, the cost of a tile is ₹ 52

There are six tiles in the front elevation

Therefore, the total cost = 6 × 52 = ₹ 312

Exercise 6.1

1. A tetromino is a shape obtained by …… squares together.
2. Draw a tetromino which passes symmetry ……
