1.3 Subtraction of Integers

K2XNSE

Let us learn subtraction of integers using number line.

Let us try to subtract integers using the number line activity we studied earlier. We should follow the same instructions as before but whenever we need to subtract, we turn towards the negative side.

To subtract (+4) from (+7)

We start at zero facing positive direction. Moves 7 units forward to represent +7 then turn towards the negative side for the operation of subtraction and move +4 units forward to represent +4. We reach the integer +3. So, $(+7)-(+4)=+3$.

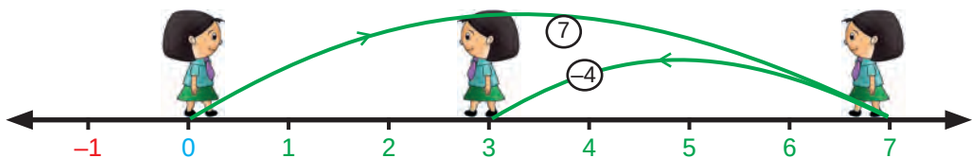

Fig. 1.13

Let us find $(-8)-(-5)$.

We start at zero facing positive direction. Move 8 units backward to represent (–8). Then turn towards the negative side and move 5 units backwards. We reach –3. We have $(-8)-(-5)$ = (–3).
