5.	Apply it	530+230+99 – (150+200)	Cost of each pen = $\frac{80}{8}$ = 10
6.	Solve it	530+230+99 – (150+200) = ₹ 509	Cost of each pen = $\frac{80}{8}$ = 10 S.P. of 4 pens = 13×4 = 52 S.P. of 3 pens = 8×3 = 24 S.P. of 1 pen = 1× 10 = 10 Total S.P. = 52 + 24 + 10 = 86
7.	Arrive the answer	Final balance = ₹ 509	S.P. (86) > C.P. (80) Therefore, profit = ₹ 6

Example 1.28

Ferozkhan collects ₹1150 at the rate of ₹ 25 per head from his classmates on account of the 'Flag Day' in his school and returns ₹ 8 to each one of them, as instructed by his teacher. Find the amount handed over by him to his teacher.

Solution

Ferozkhan collects ₹1150 at the rate of ₹ 25 per head from his classmates on account of the 'Flag Day'

Total amount collected = ₹1150

Amount per head = ₹ 25

Number of students = 1150 ÷ 25 = 46

```
      46
   ┌────
25 │1150
   │100↓
   ├────
   │ 150
   │ 150
   ├────
   │   0
```

Amount returned to each student is ₹ 8

Amount returned to 46 students = 46 × 8 = ₹ 368

Amount handed over to the class teacher = ₹ 1150

₹ 368 (–)

₹ 782

Amount handed over to the class teacher = ₹ 782

Example 1.29

Each day, the workers drill down 22 feet further until they hit a pool of water. If the water is at 110 feet, on which day will they hit the pool of water?

Solution

Depth drilled in one day = –22 feet

Depth of water = –110 feet

Number of days required = –110 ÷ –22 = 5

```
      5
   ┌────
22 │110
   │110
   ├────
   │  0
```

Hence the workers wil reach resource in 5 days.
