Exercise 5.3

Miscellaneous Practice problems

1. Choose the correct relationship between x and y from the given table.

x	–2	–1	0	1	2	...
y	4	5	6	7	8	...

(i) $y = x+4$ (ii) $y = x+5$ (iii) $y = x+6$ (iv) $y = x+7$

2. Find the trianglular numbers from the Pascal's Triangle and colour them.

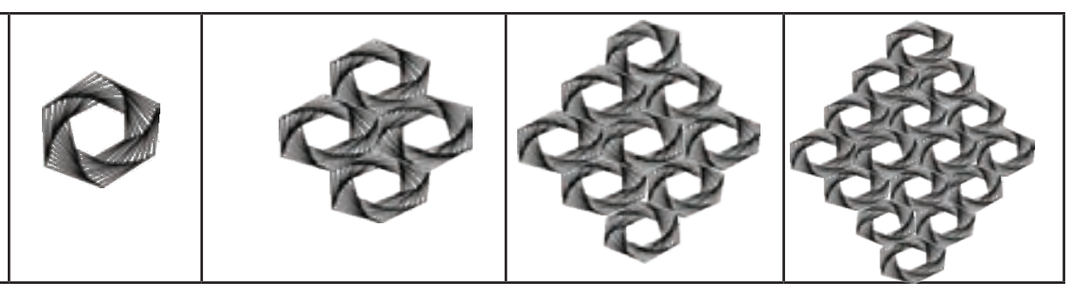

3. Write the first five numbers in the third slanting row of the Pascal's Triangle and find their squares. What do you infer?

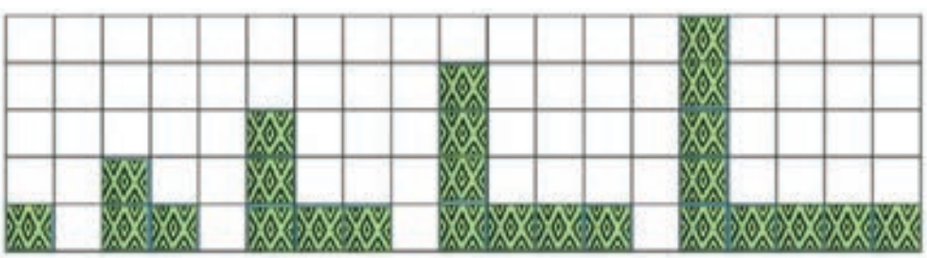

Challenge Problems

4. Tabulate and find the relationship between the variables (x and y) for the following patterns.

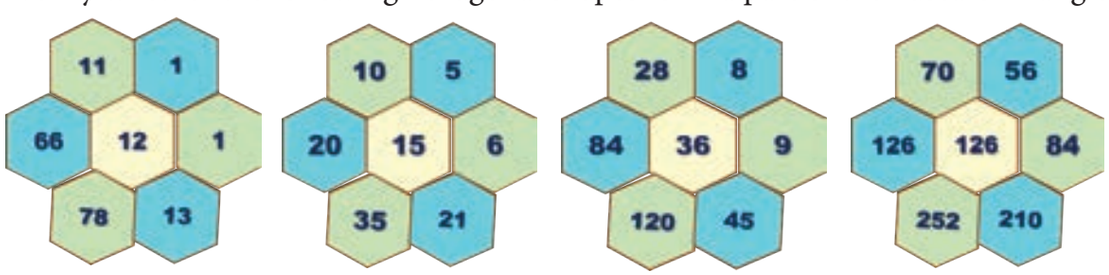

(i)

(ii)

5. Verify whether the following hexagonal shapes form a part of the Pascal's Triangle.
