

Fort William in Calcutta

b. Cantonment towns

The British occupied the Indian territory and political power by their military force. So they needed strong military camps and established the cantonments. The cantonments were thus an entirely new kind of urban centres. Army people began to live in these places and gradually they were grown up a city. For e.g. Kanpur, Lahore.

c. Hill stations

Hill stations were distinctive features of colonial urban development. Although Hill stations were not unknown, prior to their founding by the British in India, they were few and had a small population and were often visited for specific purpose. For e.g. Srinagar was a Mughal recreational centre, Kedarnath and Badrinath were Hindu religious Centres. The British coming from a cool temperate climate, found the Indian summer season inhospitable. So the cool climate of Indian hills was seen as protective and advantage. It protected the Europeans from hot weather and epidemics. So they built up the alternative capitals in cool areas, like Darjeeling was the alternative of Calcutta, Dehradun was the alternative of Delhi. Hill stations became strategic places for billeting troops, guarding frontiers and launching campaigns. Hill stations were developed both in North and South India, e.g. Simla, Nainital, Darjeeling, Ootacamund and Kodaikanal. Simla (Shimla) was founded during the Gurkha war (1814-16). Darjeeling was wrested from the rulers of Sikkim in 1835. These hill stations were also developed as Sanatoriums (places for soldiers for rest and recovery from illness). The introduction of railways made hill station more accessible.

d. Railway towns

Railway towns were also a type of urban settlements and were established in 1853 after the introduction of railways by the British. By the nature of railway transport, all the towns were located on the plains. Eg. Delhi, Mumbai, Kolkatta.
