Example

a. Measure the straight line distance between the towns Peel and Castle town.

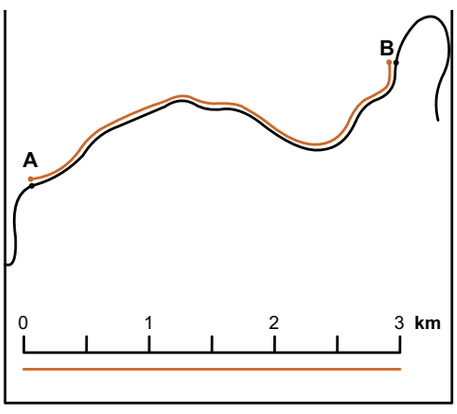

Step 1. Measure the distance between the towns Peel and Castle town with a scale or thread in cm.(example if it is 2.9 cm)

Step 2. Note the scale of the map in this case 1 cm = 10km

Step 3. Multiply the measured distance with the scale of the map.(2.9 × 10km = 29km)

Answer : The distance between the two urban centres is 29 km

a. Measure the irregular line distance between the points A and B.

Step 1. Measure the distance between the two points with the help of a thread.

Step 2. Place the thread on a scale and read the measurement in cm.
(example if it is 3.2cm)

Step 3. Note the scale of the map in this case 1 cm = 1 km

Step 4. Multiply the measured distance with the scale of the map. (3.2 × 1 km = 3.2 km)

Answer : The distance between the two points is 3.2 km

Exercise

1. Measure the road and railway distance between your nearest town and Chennai city from Tamil Nadu in your atlas.
2. Measure the length of Tamil Nadu coastline .
3. Measure distance between any two nearest villages in a topo sheet.

Activity

Using this link measure distance between any two selected places of your choice.

9.4 Measurement of Area

The measurement of a geographical area can be carried out on a map. There are number of methods used to measure area on a map. One of the simplest methods is by means of similar squares.
