ICT CORNER

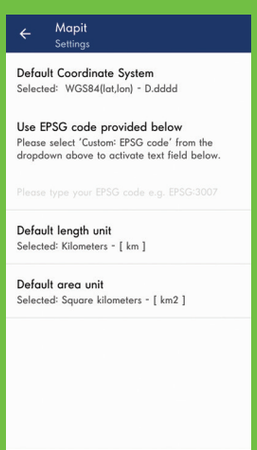

Modern Tools of Geography

Explore and survey geography using modern tools.

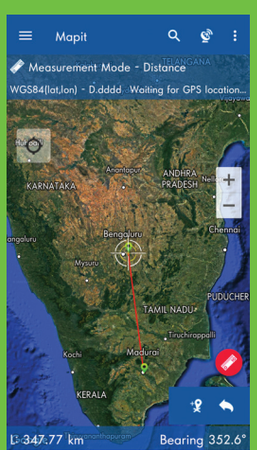

Steps

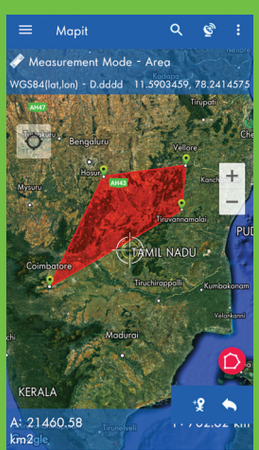

- Use the URL or QR code to download and install 'Mapit GIS' app in your smartphone. Open the app and go to settings tab on the top right corner of the page and set units of measurement of your choice.
- Select scale icon from the bottom and place the targets by pressing 'Balloon' icon from the bottom. Scale icon will provide you instant survey of distance using GPS.
- Long press the scale icon and it will transform into 'Area mode'. Follow the same step to drop the balloon and survey the area between any numbers of points.
- Touch the menu navigation button from the top left corner and change the map styles you want to survey.
