

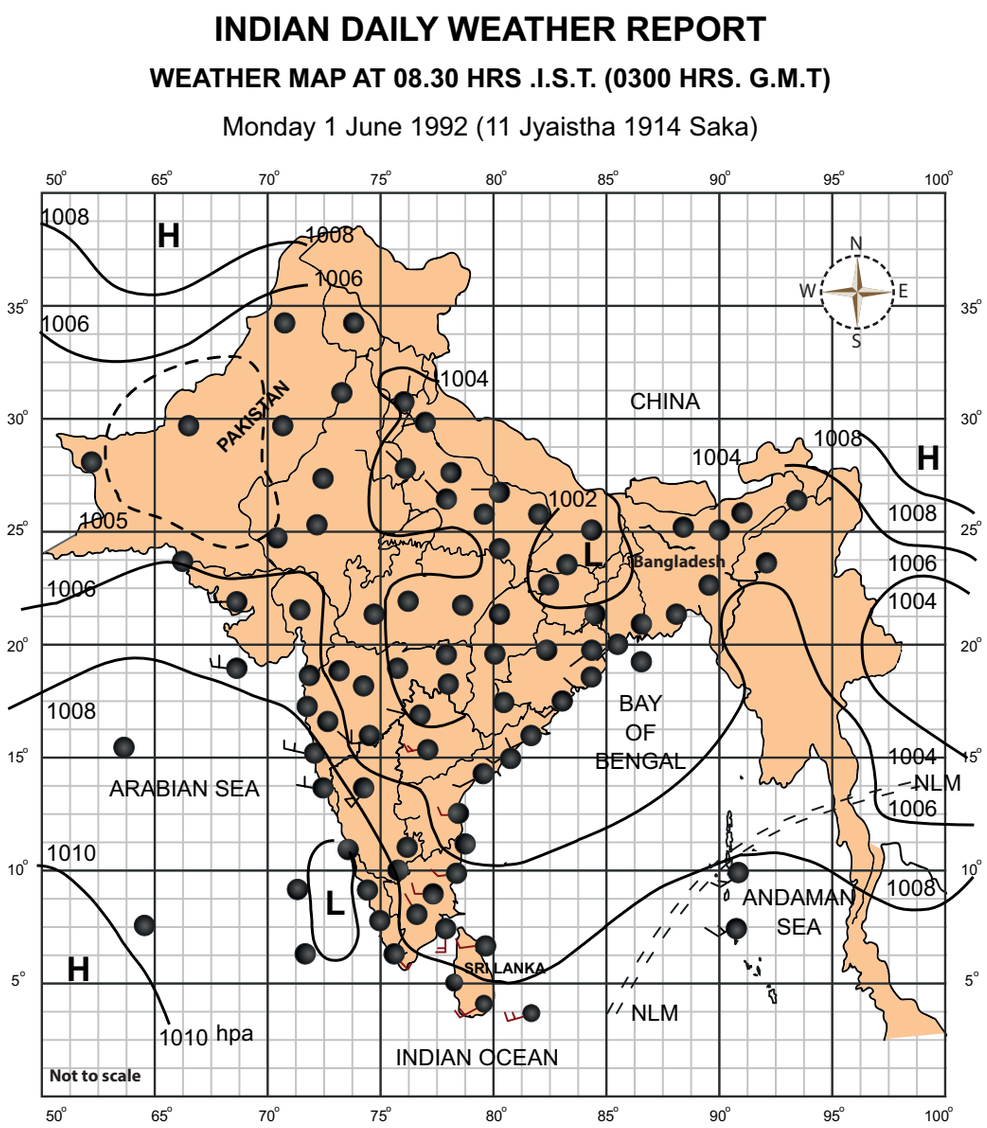

Figure 12.4 Example 1 (Monsoon Season)

4. **Gradient of Pressure:** On this map, the pressure gradient is steep along the western coast of India.
5. **Wind Direction:** The wind moves from west to east in the extreme southern part of India, The wind flows from North West to the south east in the rest of the Plateau region. The wind velocity ranges from 5 – 15 knots in most of the places on the given day. The wind is not strong in North but comparatively strong in south.
6. **Cloud Cover:** Clear sky is noticed in the North and north western part of India. Eastern coastal states are partly clouded and the southern states show extreme cloudiness and or overcast.
7. **Sea Condition:** Northern Limit of Monsoon prevails over the Andaman Sea.
