Exercises

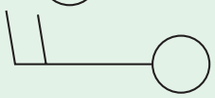

I. Answer the following

1. Give the weather symbols for the following.
   a. Hail
   b. Gentle breeze
   c. Rain
   d. Calm
   e. Obscured
2. Find the wind direction and velocity from the following wind barbs.

a.

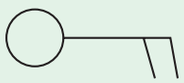

b.

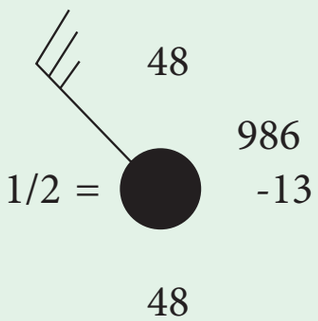

c.

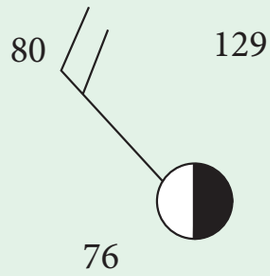

d.

3. Name the weather elements in the given Station Model.

4. Write an interpretation for the following station model.

5. Prepare a station model with the following weather parameters.
   a. Dry Bulb temperature - 22^0 C
   b. Dew point -18^0C
   c. Barometric Pressure reduced to mean sea level standard gravity is 998mb
   d. Total cloud amount -5 oktas
6. Prepare a small project of the Okchi cyclone with the help of the Satellite Images.

II. Practice

A. Make an Anemometer

Materials

- 4 small paper cups
- 4 plastic drinking straws
- Tape
- Scissors
- Straight pin
- Pencil with a new eraser
- Stapler

Procedure

1. This anemometer has four cups which catch the wind and cause the anemometer to spin. The inward curve of the cups receives most of the force of the wind. That's what makes the cups move. The more spins per minute, the greater the wind velocity.
