

Unit 3

Lithosphere: Endogenic Processes

Chapter Outline

3.1 Introduction
3.2 Interior of the Earth
3.3 Continental Drift Theory
3.4 Plate Tectonics
3.5 Plate boundaries
3.6 Convection Cell
3.7 Fold
3.8 Fault
3.9 Earthquake
3.10 Volcano
3.11 Rocks
3.12 Rock Cycle

7XRYU2

Learning Objectives:

- *Understand the structure and composition of the Earth.*
- *Develop an insight into the Continental Drift Theory.*
- *Describe the concept of Plate Tectonic movement.*
- *List and compare the characteristics and distribution of the earth's internal forces*
- *Explain rock types and rock cycle*

3.1 Introduction

Do you know that the Russians tried to dig through the centre of the Earth? It indeed is a daring attempt.

While the famous Voyager 1 satellite took 26 years to exit our Solar System (16.5 billion km away), almost the same amount of time (24 years) was taken for man to dig out a mere 12.3 km into the earth's surface.

Russia drilled Kola Super Deep bore hole between 1970 and 1994. The deepest
