**Student activity**

Look at the map given below. Label the plates or number them. Identify and colour the oceanic plates.

1. Pacific plate
2. African plate
3. Eurasian plate
4. Arabian plate
5. Australian plate
6. Caribbean plate
7. Cocas plate
8. Scotia plate
9. North American plate
10. South American plate
11. Juan de Fuca plate
12. Indian plate
13. Antarctic plate
14. Philippine plate
15. Nasca plate

1. Name the plates bordering the Indo-Australian plate.

_____

2. Which sea lies between African plate and Arabian plate?

_____

3. Which two continents, you think, may fit together?

_____

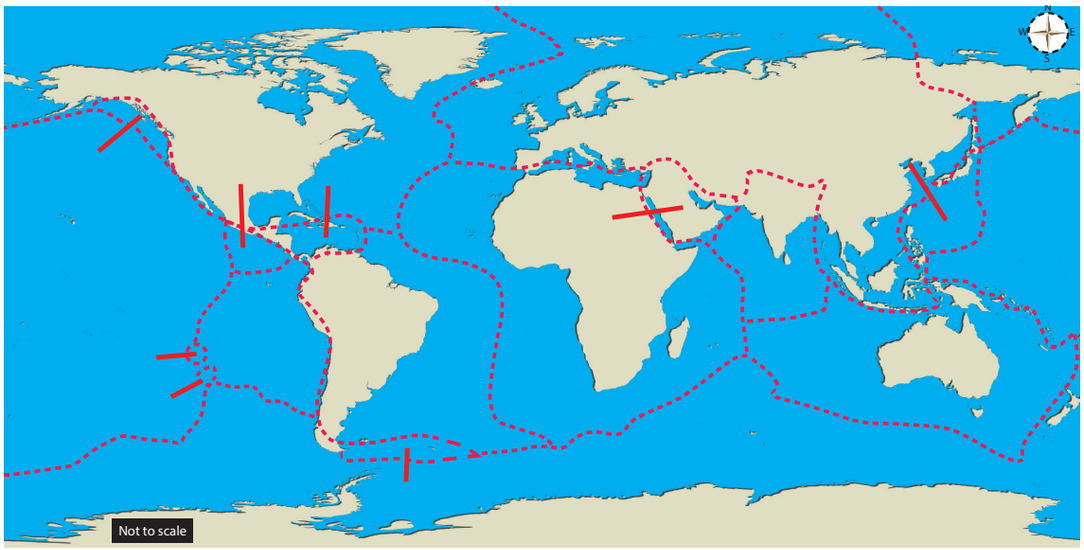

**Figure 3.9** Tectonic plates

Plates are composed of the continental or oceanic landmass. The subduction of the oceanic plates results in the occurrence of earthquakes and volcanoes adjacent to trenches.

Plate margins mark the occurrence of the most significant landforms, including volcanoes, fold mountains, island arcs and deep-sea trenches. There are three principal types of plate boundaries. They
