4. Odd one out
   a. The Eurasian plate
   b. The North American plate
   c. The Pacific plate
   d. The African plate
5. One among the given is the deepest trench in the world.
   a. The Mariana Trench
   b. The Sandwich Trench
   c. The Puerto Rico Trench
   d. The Sunda Trench
6. It is a type of fold where one limb is steeper than the other.
   a. Symmetrical fold
   b. Asymmetrical fold
   c. Over turned fold
   d. Recumbent fold
7. The longest rift valley in the world is
   a. The Narmada rift valley
   b. The African rift valley
   c. The Baikal rift valley
   d. The Rhine rift valley
8. One of the following zones accounts for 68% of the earthquakes on the surface of the earth.
   a. The Mediterranean – Himalayan zone
   b. The Circum Pacific zone
   c. The Mid Atlantic zone
   d. The African rift valley zone
9. One among the given is the world's highest active volcano.
   a. Mt. Vesuvius
   b. Mt. Stromboli
   c. Mt. Cotopaxi
   d. Mt. Krakatau
10. Solidified sheet-like horizontal lava layer inside the earth is called as
    a. Dyke
    b. Batholith
    c. Sill
    d. Lacolith

II. Brief answer

11. Define Diastrophism.
12. Why is the inner core solid?
13. Distinguish between Mohorovicic boundary and Lehman boundary.
14. Write the significance of the Ring of Fire.
15. List the types of volcano based on their frequency of eruption .

III. Short answer

16. Write a short note on the Convection cell.
17. Name the types of plate boundary.
18. Why do plates keep moving?
19. Name the types of fold.
20. Draw a volcano and label its parts.

IV. Detailed answer

21. Describe the Interior of the Earth with a diagram.
22. Explain continental drift theory.
23. Explain the types of plate boundaries.
24. Draw a diagram and describe the stages of the rock cycle.
25. On the outline map of the world, mark the distribution of volcanoes and describe briefly about them.
