Glucose monitoring

8.4.7 Special points

- Keep reagent tables in a cool, dry place at a temperature below 86^0 F(30° C).
- Do not refrigerate the reagent tablets and strips.
- Keep the container tightly closed.
- Do not use discolored or outdated tablets or strips.

8.4.8 Test For Bile Salts (Hey's Test)

- Take a test tube, half full of urine.
- Sprinkle sulphur powder on the surface of the urine.
- If the powder sinks down to the test tube, it indicated the presence of bile salts.
- This is because, bile salts reduce the surface tension of the urine and allows the sulphur powder to sink down.

8.4.9 Test for Bile Pigments

- Fill three-fourth of a test tube with urine.
- Add iodine drops along the sides of the test tube, so as to form the layer on the surface of the urine.
- A green color at the junction of the two liquids indicates the presence of bile pigments.
- Discard the urine and clean the test tube.

8.5 Helping in Bathing the Patient

Giving a bed bath means washing someone who is in bed. A bed bath cleans the skin and helps keep the skin free of infection. It helps to relax the person being bathed and help him feel better. Let the person wash himself as much as possible. Several types of bath can be used depending upon the clients need. Bath may be used for cleansing or for therapeutic measures related to some skin problems.

8.5.1 Types of Therapeutic Bath

Sitz Bath	-	To decrease pain and inflammation after rectal or perineal surgery or pain relief from hemorrhoids.
Hot water bath	-	To relieve muscle spasm and muscle tension.
Warm water bath	-	To relax and sooth.
Cool water bath	-	To decrease fever and to reduce muscle tension.
Oatmeal or aveneo	-	To sooth irritated skin, softens and lubricates dry scaly skin.
Corn starch	-	To sooth skin irritation.
