3. Check ABC Rule. (Airway, breathing, Circulation)
4. Open the airway by tilting the head.
5. Give artificial respiration if breathing has stopped.
6. Perform chest compression if the pulse is not present
7. Stop bleeding if any by direct pressure.
8. Treat for shock.
9. Do not allow people to crowd around.
10. Don't remove clothes unnecessarily.
11. Arrange for transportation of the casualty.
12. Casualty should be sent to a hospital or doctor by quickest means of transport. Always inform police about serious accidents and the relatives.

9.3 First aid for patients with Wound, Hemorrhage, and Shock

9.3.1 Wounds

Any abnormal break in the skin or the body surface is known as a wound.

In all wounds, even in small cuts or tiny stab wounds, there is danger that germs will grow in the wound, causing an infection.

Types of Wound

1. Penetrating wound-wound that breaks through the full thickness of skin.
2. Non-penetrating wound-wound does not break through the skin.
3. Miscellaneous wound

Penetrating wound	Non-penetrating wound	Miscellaneous wound
Stab wound Trauma from sharp objects,	**Abrasions** Scraping of the outer skin layer.	**Thermal wound** Injuries resulting from extreme hot or cold.
Skin cuts Cuts in the skin to perform surgical procedures.	**Laceration** Skin and tissue may be partly or completely torn away.	**Chemical wound** Injuries result from contact with or inhalation of chemical materials.
Gun shot wound Wounds resulting from fire arms.	**Contusions** The soft tissues beneath the skin are damaged but the skin is not broken.	**Bites and stings** Injuries resulting from bites from human, dogs, rodents, snakes, scorpions and tick.
	Concussion Damage to the underlying organs and tissue without external wound.	**Electrical wound** Injuries results from passage of high-voltage electrical current.
