Type of Disaster	Possible First Aid Services
	2) Protect living beings from water borne diseases 3) Ensure everyone consumes non-contaminated food and water. 4) Arranging essentials and necessities if the water level is increasing. 5) Moving to safer places if the water level isn't receding after a point of time.

The first aid immediately after a disaster may consist of the following-

1) Attending to the individuals who have broken limbs, bones and apply local massage therapy.
2) Disinfecting the body parts/areas where there has been minor bruises with antiseptic and then plastering those areas with bandage.
3) Attending the parts having burns.
4) Putting in place a working communication system.
5) Prevent the spread of contaminated food and drinking water.
6) Provide post-accident SOS support services to all the affected individuals.

9.9.2 Disaster Triage

The word triage is derived from the French word trier, which means, "to sort out or choose."

"Triage is a process which places the right patient in the right place at the right time to receive the right level of care"

(Rice & Abel, 1992)

Types of Triage

There are two types of triage:

1. Simple triage
2. Advanced triage

Simple Triage

Simple triage is used in a scene of mass casualty, in order to sort patients into those who need critical attention and immediate transport to the hospital and those with less serious injuries.

S.T.A.R.T. (Simple Triage and Rapid Treatment) is a simple triage system that can be performed by lightly trained lay and emergency personnel in emergencies.

Triage separates the injured into four groups:

- 0 – The deceased who are beyond help
- 1 – The injured who can be helped by immediate transportation
- 2 – The injured whose transport can be delayed
- 3 – Those with minor injuries, who need help less urgently

Advanced Triage

Advanced care will be used on patients with less severe injuries. Because treatment is intentionally with held from patients with certain injuries

It is used to divert scarce resources away from patients with little chance of
