- It is essential for healthy life
- to find out the vital health statistics in community

Responsibility II: Plan Health Education Strategies, Interventions, and Programs

- Actions are based on the needs assessment done for the community (see Responsibility I)
- Involves the development of goals and objectives which are specific and measurable
- Interventions are developed that will meet the goals and objectives
- According to Rule of Sufficiency, strategies are implemented which are sufficiently robust, effective enough, and have a reasonable chance of meeting stated objectives

Responsibility III: Implement Health Education Strategies, Interventions, and Programs

- Implementation is based on a thorough understanding of the priority population
- Utilize a wide range of educational methods and techniques

Responsibility IV: Conduct Evaluation and Research Related to Health Education

- Depending on the setting, utilize tests, surveys, observations, tracking epidemiological data, or other methods of data collection
- Health Educators make use of research to improve their practices.

Responsibility V: Administer Health Education Strategies, Interventions, and Programs

- Administration is generally a function of the more experienced practitioner
- Involves facilitating cooperation among personnel, both within and between programs

Responsibility VI: Serve as a Health Education Resource Person

- Involves skills to access needed resources, and establish effective consultative relationships.

Responsibility VII: Communicate and Advocate for Health and Health Education

- Address diverse audience in diverse settings
- Translates scientific language into understandable information
- Formulates and support rules, policies and legislation
- Advocate for the profession of health education

10.6 Audiovisual Aids

Audiovisual aids play an important role in health education. They can be classified into three groups – purely auditory aids, purely visual and a combination of both auditory and visual aids

Media or materials in health education can be used for different purposes and for different groups of
