people. Learning and understanding seems to result when more senses, such as touch, sight and hearing are reached by the media.

If used properly they create interest and motivate people to learn. Learning is made more permanent because these aids supply a concrete basis for learning rather than abstract thinking.

10.6.1 Types of Audio - Visual Aids:

No health education can be effective without audio-visual aids. Audio-visual aids can be classified into 3 groups – (1) purely auditory;(2) Purely visual; (3) combined audio-visual.

(1) Auditory Aids

(2) Visual Aids

10.6.2 Combined Audio-Visual Aids

- Sound films
- Slide tape combination
- Television
- Computer & Internet
- A Knowledge of the advantages, disadvantages and limitations of each audio-visual and is necessary in order to take proper use of them. Audio-visual aids are means to an end; not an end in themselves.

10.6.3 Audio Visual Aids (Used in Mass Media:)

(1) **Posters:** Posters are intended to attract public attention. Therefore, the material needs artistic preparation. The message on the poster should be short, simple, direct and one that can be taken at a glance and easy to understand. The life of a poster is usually short and needs frequent replacement. As a medium of health, education, posters are not effective in changing human behaviour.

Posters should be colourful to catch the eye and convey the message clearly, Simple language and short sentences should be used. If used in the clinic, Outpatients department or health centers, they should be changed frequently. When possible explain the message to the learners and use them to supplement the teaching

(2) **Health Magazines**: A good health magazine can be an important channel of communication. The material needs expert presentation.
