11.1 Introduction

Medications are frequently used to manage diseases. Administration of medication is the main responsibility of a nurse. Hence it becomes important that nurses should have a sound knowledge of actions and effects of medications. Administering medication safely requires an understanding of all aspects of pharmacology.

All around the world, registered nurses play an important role in administering medication to patients in a typical busy hospital environment. This duty requires a huge amount of effort on behalf of nurses to stay updated about medical advancements and pharmaceutical drugs. Improving knowledge about medication requires a continuous education on drugs among nurses.
