

Factors Affecting Drug Metabolism

Age: Neonates and elderly metabolize to a lesser extent than adults.

Diseases: Liver diseases impair the drug metabolism.

11.13.4 Drug Excretion

Removal of the drug and its metabolites from the body is known as drug excretion. The main channel of excretion of drugs is the kidney; others include lungs, bile, faeces, sweat, saliva, etc.

11.14 *Nurses Responsibility in the Administration of Medications*

- Assess gag reflex and patients ability to swallow.
- Do not touch tablets.
- Head end of the bed should be elevated at least by 90 degrees to administer oral medications.
- Make sure the patient as swallowed the medication.
- It is essential to hand wash before preparation of drugs.
- Always check for patients history for allergies.
- Check the expired dates of drugs and before administering.
- Never administer medications prepared by another staff member.
