UNIT 13

Documentation

FXB6R7

LEARNING OBJECTIVES

After learning this chapter students will be able to

- define Records and reports
- list the purposes of Documentation
- describe the principles of Documentation
- explain about Documentation Format
- describe about types of records
- enumerate about reports
- state the Nurses responsibility in record keeping
- illustrate with Examples of Documentation

13.1 Introduction

Document is described as any written or electronically generated information about a patient status or the care or the service provided to that patient. Nursing documentation is the record of nursing care that is planned and delivered to individual client. Nursing documentation is varied , complex and time consuming depends on the severity of the patient condition.

Records and reports are the essential components for implementation and evaluation of patient care in the hospital or community. Hence the documentation is consider as an integral part of nursing practice, and is necessary to ensure high quality of patient care. This chapter is to discuss about the importance of documentation which includes recording and reporting. The Nursing and Midwifery Council (NMC 2002) stated that 'good record keeping helps to protect the welfare of patients.

13.2 Definition

13.2.1 Documentation

It is the process of communicating in written form about essential fact. Records and reports are essential components of documentation.
