4.4 Gloving

Gloving is defined as the putting up of a pair of sterile gloves to protect own hand from pathogenic micro organisms and to avoid contamination of a sterile areas by hand.

Purpose:

1. To protect the nurse from the pathogenic microorganisms.
2. To safely use her hands to handle without contaminating any objects.

Indication:

1. Contact with open wound.
2. For strict aseptic diagnostic procedures.
3. Handle with infected materials like blood, Urine, Faeces etc.
4. Nurse or health personnel with any cut injury in hands or fingers.
5. For surgical procedure and delivery procedure.

Steps to procedure:

1. When the glove packet is collected from the autoclaved bin and places flat on the sterile towel.
2. The packet of powder is removed from the glove pack and the hands are powdered.
3. Identify right and left hand.
4. Pick up the left glove with the right hand by the inside turned down cuff.
5. Carefully push the fingers of the left hand into the glove until it reaches the cuff.
6. Pick up the right glove by putting the gloved hand under the cuff.
7. Carefully push the fingers of the right hand into the gloved hand into the glove and pull the glove cuff over the cuff of the down.
8. Now pull the cuff on the left glove completely over the glove cuff to the left hands.
9. Adjust the gloves.

4.5 Wearing Masks

Mask are worn to reduce the risk for transmission of organisms by the droplet contact, air borne routes and splatters of body substances.

Purpose:

1. The mask should be worn by personal who work close to the client if the infection is transmitted by large particle aerosol.

Eg. Measles, mumps, acute respiratory diseases in children.

2. The mask should be worn by all personal entering the room if the infection is transmitted by small particle aerosols (droplet nuclei) eg. Pulmonary tuberculosis.

Steps to procedure:

1. Find top edge of mask (usually has thin metal strip along edge).
2. Hold the mask by top two strings tie two top ties at the top of the back of the head with ties above ears.
3. Tie two lower ties snugly around the neck with the mask well under the chin.
4. Ensure that the mask covers the mouth and the nose adequately.
