6) Empty the content and rinse the bedpan with cold water. Then clean it with the brush kept in soap solution. The bedpan may be soaked in disinfectant for one hour or sterilised if there are facilities for dui so.

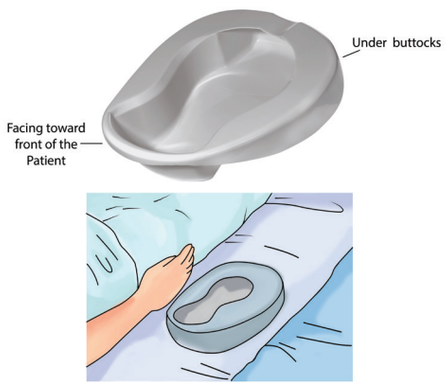

7) Remove other articles from the bedside. Clean and put them back in proper place.

8) Wash your hands well. Remove the screen and leave them until tidy, record the time and observation.

## 8.2 Offering Urinal

**Definition:-** Bed rest or immobility can interfere with micturition (act of passing urine). It does not allow the patient to have the normal position for emptying the bladder.

For a man who has not been able to reach the toilet facilities he may stand at the bedside and avoid into a plastic or metal receptacle for urine. If he is unconscious or enable to stand at bedside the assistant needs to assist him to use the urinal.

### Purpose

1. Provide a container for collection of urine
2. To measure the urine output
3. For observation of colour and consistency of urine

### Indications

1. For patient with impaired mobility due to surgery, fracture, injury
2. Elderly man (aging impaired micturition) may require urinal more frequently to avoid urinary incontinence
3. For mobile person who is able to go to bathroom, does not required the urinal
