In ***oral communication***, spoken words are used. It includes face-to-face conversations, speech, telephonic conversation, video, radio, television, voice over internet.

In ***written communication***, written signs or symbols are used to communicate that includes email, letter, report, memo, etc.,

Nonverbal communication is the sending or receiving of wordless messages. It is otherwise called as body language. It includes

- Posture and gait are often reliable indicators of self-concept, mood and health
- Facial expressions convey a universal meaning
- Eye contact eg., mutual eye contact
- Body movements eg., shrugging shoulders
- Touch brings close relationships
- Tone of voice display honesty and competence
- Signal is a sign to give instruction or warning
- Symbol is a sign that represents ideas

THE FIRST COMMUNICATION DEVICE

The telephone (meaning "far sound") is the most widely used telecommunications device. It was invented in 1876

by Alexander Graham Bell

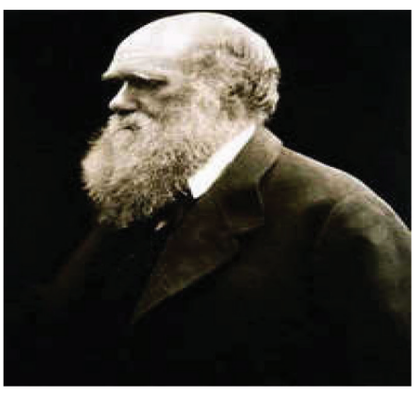

Who was the first to study body language and its origins?

No other than Charles Darwin, the father of evolution, himself. He was the first man to study the body language of humans and animals in his book "The Expression of the Emotions in Man and Animals" in 1872.

By careful observation he noticed that humans, like animals, **share some inborn behaviors that are common to all of us**. These non verbal cues revealed internal emotions or used to help communicate with others.

The study of body language in communication called **Kinesics**. It's aim is to categorize and understand how different gestures developed and their meaning in communication.

Charles Darwin
