Build-up: People begin to trust and care for each other.

Continuation: It follows a mutual commitment for a long duration.

Deterioration: Not all relationship deteriorates. Some may deteriorate due to loss of trust or dissatisfaction.

Termination: This final stage leads to an end of the relationship either by death or by separation.

4.7.4 Principles of IPR

- **Mutual Benefit Principle:**

  The strong interpersonal relations are formed when people share same group of interests. It helps them to form a strong bond and meet up the social need of themselves.

- **Credit Principle:**

  For making the relation with the people fruitful and pleasant it is important to make people feel that you are useful for them.

- **Respect Principle:**

  Everyone has a right of freedom to speech so everyone has right to share their thoughts. Only through respect one can maintain good interpersonal relationships.

- **Tolerance Principle:**

  Tolerance means that a person does not care about small minor issues, and by keeping aside the disturbing issues.

- **Moderation Principle:**

  To maintain a good social interpersonal relation one should keep a moderate way to deal and communicate with people.

THERAPEUTIC NURSE BEHAVIOURS

Self-awareness - Internal evaluation of one self and of one's reactions to emotionally charged situations, people and places

Genuine, warm and respectful - Highly skilled, experienced nurses must possess these attributes or skills to successfully establish a nurse client relationship

Empathy - Having the ability to enter the perceptual world of the other person and understanding how they experience the situation

Cultural sensitivity - Cultural backgrounds effect people's perceptions of life and health
