3. Verbal Response (1-5 POINTS)

a) Oriented (v5);

The patient can talk and answer questions about his location, time, and who he is. This scale is used to measure the level of consciousness traumatically injured persons and all chronically ill patients.

SUMMARY

Health assessment is an important component in health care for proper diagnosis and effective treatment. Health assessment includes physical assessment, mental status examination, laboratory investigation and special investigation. Assessment techniques are inspection, palpation, percussion, auscultation, manipulation, reflex testing and olfaction.

The balance between heat production and heat loss is called as "normal body temperature". Adult normal body temperature is 37°C or 98.4 °F. Sites to assess the temperature are oral, rectal, axillary, temporal artery and the groin.

Types of thermometers are mercury thermometer, electronic thermometer, temporal artery thermometers and disposable thermometers. Pulse is the expansion felt in an artery where it can be pressed against a bone site. The normal pulse rate of the adult is 60- 80 /minute. Respiration is the act of inhalation and exhalation of air.

Pulse oxymeter is a device to measure the oxygen saturation of the blood and pulse rate.

Blood pressure is the force or pressure of blood against the walls of blood vessels as it flows through them. Types of blood pressure monitors are sphygmomanometer, electronic blood pressure device, measurement device and dial type of BP apparatus.

There are four types of consciousness .They are alert, response to voice, response to pain and unresponsive.

The Glasgow coma scale is an assessment based on numeric scoring of the patient's responses.

EVALUATION

I. Choose the correct answer

1. Striking and tapping with fingers are called
   a) auscultation
   b) manipulation
   c) olfaction
   d) percussion

2. Assessment by the sense of touch is called
   a) percussion
   b) manipulation
   c) palpation
   d) inspection

FIJYUT

3. Adult normal body temperature is
   a) 98.4°F b) 94.8°F
   c) 94.4°F d) 99.4°F
