

Diplococci arranged in pairs

e.g. Streptococci pneumoniae

Pleomorphic

e.g. Corynebacterium diptheriae

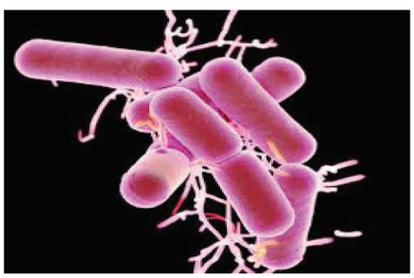

Rod shaped bacteria

e.g. E. coli

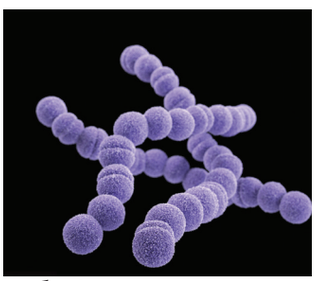

Endospore

e.g. Clostridium tetani

Peritrichous flagella

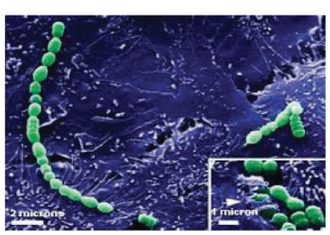

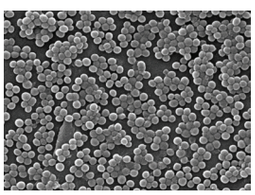

e.g. Salmonella typhi

Cocci in chains

e.g. Streptococcus pyogenes

Type of Bacteria based on morphology:-

Cocci in chains (Spherical form or oval)		Streptococci
Cocci in cluster		Staphylococci
