7.5.1.4 Text Operator:

In Calc, "&" is a text operator which is used to combine two or more text. Joining two different texts is also known as "Text Concatenation" (Refer Figure 7.23). An expression using the text operator has the following syntax:

text reference1 & *text reference2*

When arithmetic operators are used in a formula, Calc calculates the results using the rule of precedence followed in Mathematics. The order is:

I. Exponentiation (^)

II. Negation (-)

III. Multiplication and Division (*, /)

IV. Addition and Subtraction (+, -)

Here is an example to illustrate how to create a formula:
