After entering Base and Exponent cell references, the function wizard appears as shown in Figure 7.47

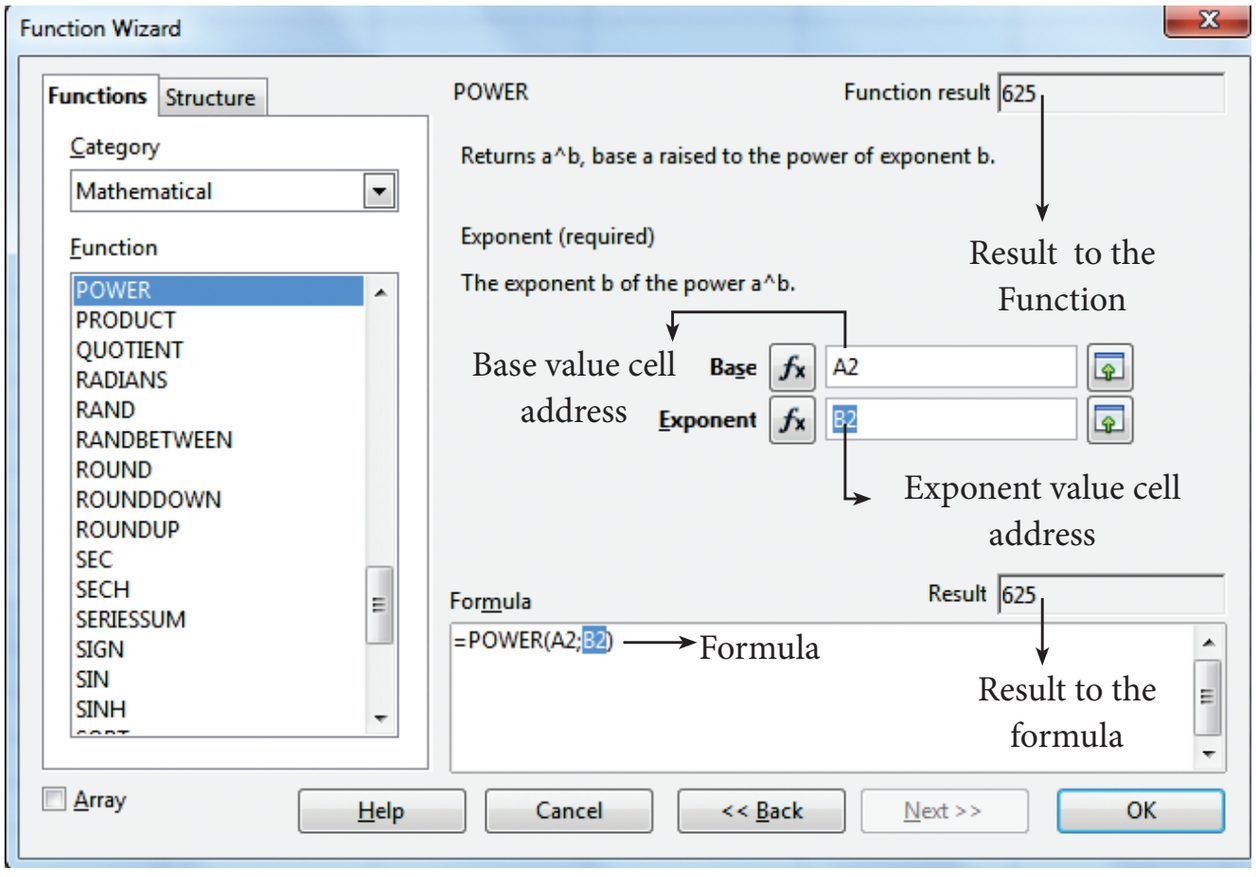

Figure 7.47 Function wizard

The formula box displays the syntax of the function with input values and Result box displays the result value.

Step 11: If the result is correct, click "OK" button else click "Back" button to display the previous page of this wizard.

Inserting a function using Function Wizard: (with direct values)

In the previous example, Cell addresses are used for Base and Exponent values. In Calc, direct values can be used instead of using cell reference (i.e. cell address) to find the same result.

In this case, type base and exponent value instead of cell address. Function wizard displays the result in the current cell. Refer Figure 7.48 shown below.
