

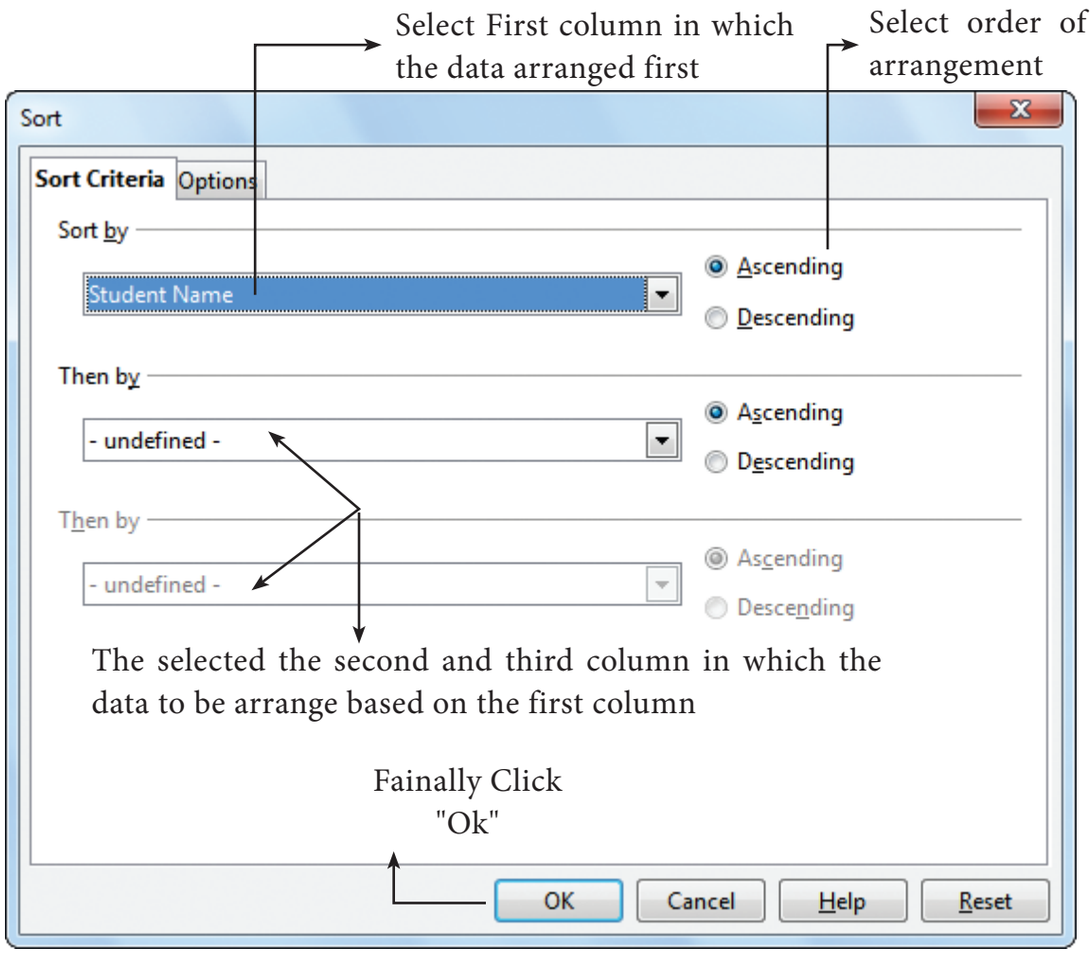

Figure 7.67 Multi-sorting dialog box

(3) Sort by selection

In Calc sorting can be done on selected range. But this kind of sorting is generally not recommended, because the other relevant data are also not sorted. Therefore, OpenOffice Calc displays a warnning message for this type of sorting. Refer Figure 7.68.

Sorting data by selection:

Step 1: Select any particular field in which you want sort.

Step 2: Click required Sort icon from standard tool bar or **Data** → **Sort command**.

Calc, display a **"Sort Range"** warning message as shown in the Figure 7.68

"Sort Range" message box has two options, viz. (1) Extend selection (2) Current selection.

Step 3: "Extend Selection" – Sort all the data based on the selection.

"Current Selection" – Sort only the selected range of data, remaining data are not sorted.
