Tip Notes

Though it is highly recommended to use the slide masters whenever possible, there are occasions where manual changes are needed for a particular slide, for example to enlarge the chart area when the text and chart layout is used.

The pre-packaged presentation styles can be modified, but new presentation styles cannot be created.

Figure 8.39 Shows the Slide Master.

- **Click View → Master → Slide Master**

It is possible to view the Master slides in two styles:

1. Slide Master
2. Notes Master
