

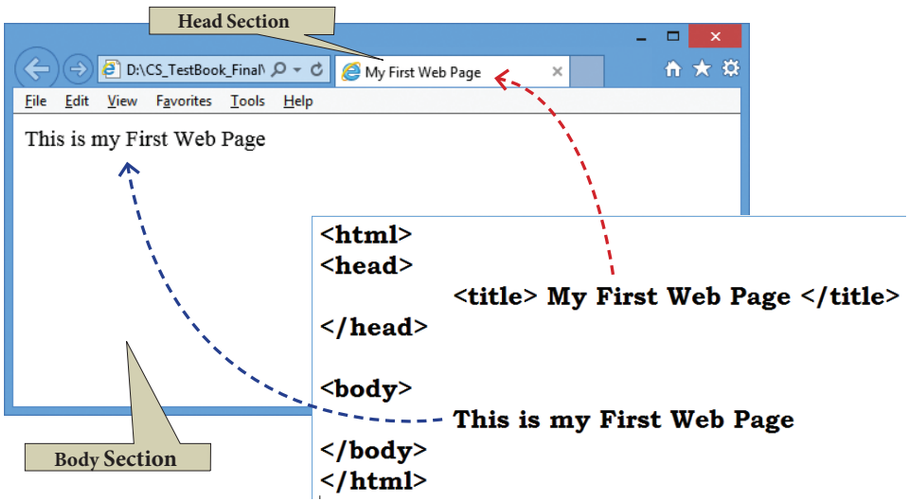

Figure 10.1 – Internet Explorer with my first web page

10.2.2. Structural Tags of HTML:

<html>, <head>, <title> and <body> these four tags are known as structural tags. These tags are basic essential elements to construct a web page.

Table: 10.1

Opening Tag	Closing Tag	Description
<html>	</html>	The <html> tag identified the document as an HTML document. All HTML documents should begins with <html> and end with </html>.
<head>	</head>	The <head> tag contains information about the document, including its title, scripts used, style definition and document descriptions.
<title>	</title>	The <title> tag contains the title of the document. The title specified between opening and closing tags appears in the title bar / page tab of the browser. <title> tag should be placed within <head> tag.
<body>	</body>	The <body> tag encloses all the tags, attributes and information to be displayed in the web page. <body> tag should be entered below the </head> tag.

10.2.3. HTML Writing Tools

To get started writing HTML, there is no need of web server, web hosting or even internet connection. You can write, test and link web pages without a network. To create and testing a HTML document i.e. web page need an application (text editor) to write HTML code and a browser to view them. Using a simple text editor (Notepad for Windows or getit for Linux) is a good way to learn HTML coding.
