Illustration 10.4 – HTML code to set left and top margins

```
<html>
<head>
        <title> Setting Margins </title>
</head>
        <body leftmargin = 50  topmargin = 50>
        This is my Web page with top and left margin
</body>
</html>
```

The statement <body leftmargin = 50 topmargin = 50> will intent the body text 50 pixels away from the left as well as from top edge of the browser.

Illustration 10.5 – Create a web page (HTML document) to the following specification.

- Title: My First Web Page
- Text to be display: Welcome to Computer Applications
- Background color: Lime
- Body text color: Blue
- Margin: from left and top 1 inch

```
<html>
        <head>
                <title> My First Web Page </title>
        </head>
        <body bgcolor = Lime text = blue  leftmargin = 72  topmargin = 72>
                Welcome to Computer Applications
        </body>
</html>
```

Remember that, when you use more than one attribute within an HTML element (Tag) space is used as separator.

10.4 Headings

Headings are used to include titles to sections of a web page. HTML has six levels of headings viz. **<h1>** to **<h6>**. The number with **h** indicates the level of heading. Header tags are display the body text as bolder and larger in size according to its level.

The syntax of heading tags:

<h…> Heading text </h…>
