CHAPTER 11

HTML - Formatting text, Creating Tables, List and Links

Learning Objectives:

The students will learn the following:

- How to formatting text contents of an HTML document with variety of tags and attributes.
- How to create and manipulate tables in HTML.
- How to create different types of List.
- What is Link and how to create internal and external links.

In the previous section you learn how to create a web page with basic elements. In this section, you are going to learn about how to format the text such making bold, italic, underline, changing font style, font size, font color and more. Formatting text is very important as well as interesting task in creating web pages. Formatting is purely based on your imagination and creativity.

11.1 Text Formatting Tags of HTML

In the previous chapter you learnt how to create a web page with basic elements. In this section, you are going to learn about how to format the text such as making bold, italic, underline, changing font style, font size, font color and more. Formatting text is very important as well as interesting task in creating web pages. Formatting is purely based on your imagination and creativity.

11.1.1 Bold, Italics, Underline

, , <u> are the tags to make the text as bold, italic and underline. These are all container tags. You know well about container tags. All container tags required a closing tag. These tags are otherwise known as **"Physical Style"** tags.

Table 11.1 Physical Style Tags

Opening Tag	Closing Tag	Description
		Text will be bold
		Text will be italics
<u>	</u>	Text will be Underlined
<tt>	</tt>	Text will be old type writer style i.e. fixed width font
