12.3 Adding Video and Sound

Video and Sound are the core part of the modern web pages. In HTML, a video or audio content may be included as Inline or external data. The inline refers to audio or video files are handled as part of the page. These media files play the audio or video when the page is visible in the browser window. The external refers, linking external audio or video files as url.

The **<embed>** tag is used to attach an audio or video file easily within webpage. This tag includes the controls of the multimedia automatically in the browser. The **<noembed>** tag may be used as an alternate to display some other media file, in the case of the browser does not support <embed> tag.

Src is the primary attribute used with <embed> tag. The src attribute used to specify the name of the media file with its source location. Other attributes such as alt, height, width and align are used as it is used with <img>.

General Format:

<embed src = audio / video file name with location> </embed>
