```

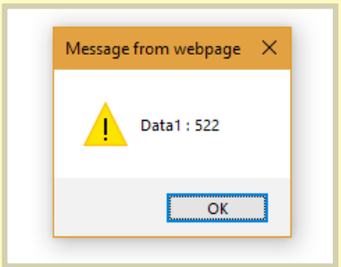
Output:



14.7.2 Confirm Dialog Box:

A confirmation dialog box is mostly used to take user's consent on any option. It displays a dialog box with two buttons: **OK** and **Cancel**. If the user clicks on the **OK** button, the confirm() will return true. If the user clicks on the Cancel button, then confirm() returns false.

The syntax of confirm dialog box is

```
confirm("message");
        (or)
window.confirm("message");
```

Example:

```
confirm("Hai Do you want to continue:");
        (or)
window.confirm("Hai Do you want to continue:");
```
