```
if (expression)
        {       statements if true    }
else
        {       statements if false   }
```

This form is similar to if statement but the only difference is the **else** keyword, which provides an alternate path for execution to follow if the condition evaluates to false.

Illustration 15.2 Using if.. else statement

```
<Html>
<Head>
        <Title>Demo Program - To test if..else command in JavaScript </Title>
</Head>
<Body>
        <script language="javascript" type="text/javascript">
        var age = prompt("Please enter your Age :", "0");
        if(age>=18)
        {               alert("You Are Eligible to get Driving Licence..");          }
        else
        {       alert("You Are Not Eligible to get Driving Licence..");    }
</script>       </Body>       </Html>
```

The output will be
