15.1.1.2 else if Statement:

The **if ... else** statement evaluates an expression and executes one of two pieces of code, depending on the outcome. The **else if** statement to specify a new condition if the first condition is false.

```
if (n == 10)
{               // Execute code block #1     }
else if (n == 20)
{               // Execute code block #2     }
else if (n == 30)
{               // Execute code block #3     }
else
{               // If all else fails, execute block #4  }
```
